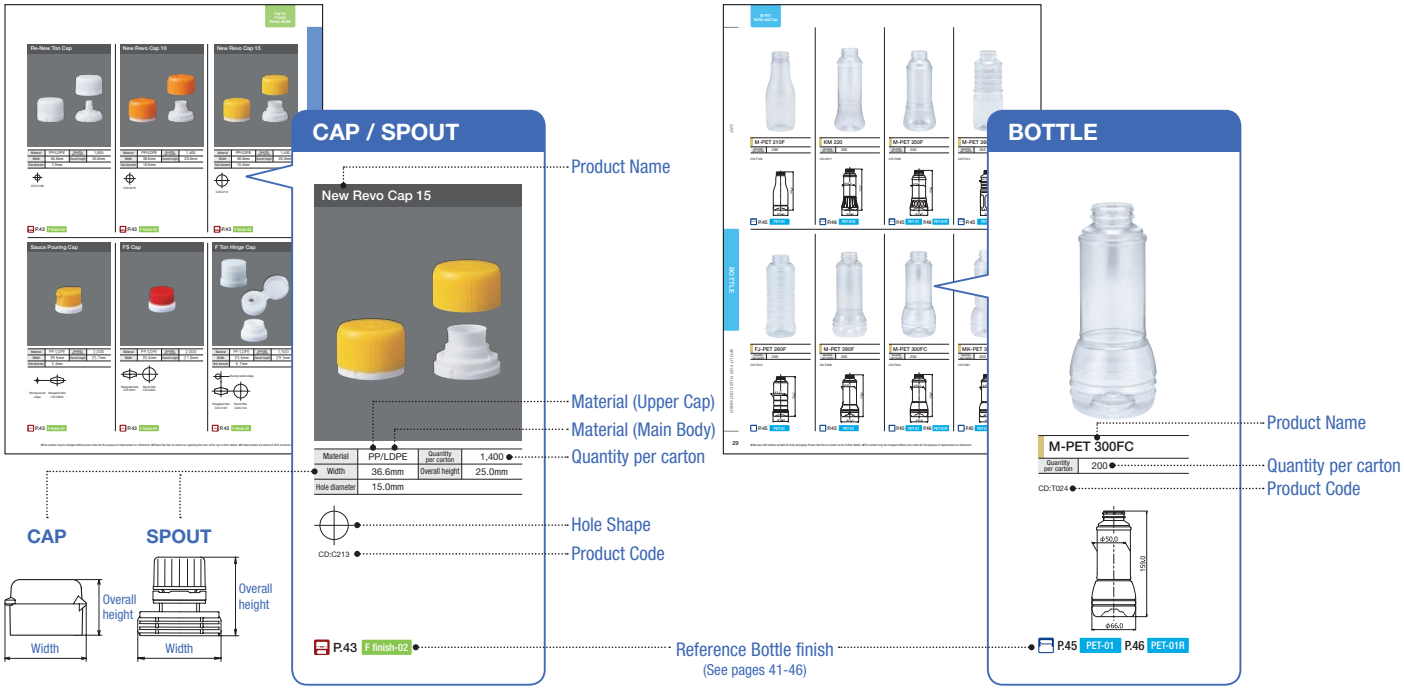
PRODUCT CATALOGUE

MIKASA INDUSTRY CO., LTD.

How to Read the Catalogue

When viewing products from this catalogue, please refer to the following.



Product photos show caps at 50% reduced size and bottles at 35% reduced size.
Please feel free to contact us regarding product and cap colors. Actual dimensions may differ from those listed.

Cap Types

Our products are available in a wide variety of styles that you can choose from.
In addition to the above, we also offer a wide selection of caps to suit your needs, depending on the container and filling conditions, please feel free to contact us.

Snap-on / Screw

Mikasa's caps are broadly categorized into snap-on type and screw type.

Hinge

Basically the main body and the upper cap are connected by a hinge, forming a one-piece cap.

Two-Piece

This is a two-piece cap with the body and upper cap connected by threads.

Three-Piece

This is a three-piece cap, consisting of a body and two upper caps, similar to a pointed cap.
The body and upper caps are typically attached with a screw-in mechanism.

Inner cap + Overcap

It is used in combination with an inner cap that is directly attached to the bottle and an overcap that matches the bottle or inner stopper. Overcaps are available in screw-on and snap-on types.

Plastic Crown cap

This cap has a tampe-evident function, as typified by the"GS Crown". It can be easily opened by tearing the seal, and one part of the cap can still be used as closure after opening.

CAP

We have categorized the appropriate caps for each bottle finish.
We offer a wide range of caps with various features, including heat resistance, recyclability, and anti-slip functions.

05 Cap for Mini finish (M finish) Bottle

08 Cap for Narrow finish Bottle

11 Cap for Wide finish Bottle

13 Cap for F finish Plastic Bottle

20 Cap for Multi-Purpose Bottle (Food)

22 Cap for Multi-Purpose Bottle
(Personal care: Toiletry, Medicines & More)

BOTTLE

Apart from standard PET bottles with snap-on finish, we also provide plastic bottles but with glass bottle finish. We offer bottles with specialized features such as heat resistance, squeezability, and various other features, complete with compatible cap proposals.

27 M-PET Bottle and Cap

SPOUT

Film pouches are excellent for reducing volume, weight, and disposal.
Mikasa Industry offers suggestions for the best spouts.

Features of the Spout

Pouches (film containers) are packaging solutions that allow storage volume reduction after use and contribute to resource saving.
By attaching a spout to the pouch, refilling into bottles can be done easily and smoothly.
The spout is a resealable, environmentally friendly packaging solution.

The width and overall height of the product are as shown in the reference illustration on the right.

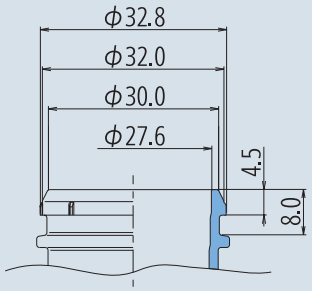
The compatible cap shown in F finish-01 on p.43 can be used with these bottles.

PET-01R F finish With Ratchet



By adding a ratchet mechanism to the bottle finish prevents the inner plug from rotating together with the covercap during opening. This improves openability and eliminates co-rotation when using with an covercap that is screw-engaged with the inner plug.
